Profile

Motivated and detail-oriented computing student with knowledge in technical support, troubleshooting, web development, and basic accounting. Currently pursuing an NCC Level 5 Diploma in Computing with experience in academic IT projects, problem-solving, and accounting-related training. Passionate about learning new technologies and eager to contribute technical, communication, and organizational skills in a professional working environment.

Academic Projects

Floral Essence Dynamic Website

Developed a dynamic flower shop website using PHP, MySQL, HTML, CSS, and JavaScript. Implemented customer login, product management, shopping cart, and admin dashboard features. Designed responsive user interfaces and managed database integration using XAMPP and VS Code.

Fitness Mobile Application

Developed a fitness mobile application using Kotlin as an academic assignment project. Implemented user-friendly interfaces and basic fitness-related features while improving mobile application development and problem-solving skills.

CUSTOMER SERVICE EXPERIENCE

Family Grocery Business Assistant

Assisted customers, arranged products, and supported daily shop operations.
